THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. ## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to the Applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.
3. Authorization for this Examiner's Amendment was given by Applicant's representative James Bennin in a telephone call on 06-04-2010.

#### **EXAMINER'S AMENDMENT**

4. The Examiner's Amendment that follows were submitted in the Notice of Allowance mailed 08/02/2010. On 11/02/2010 Applicant filed a Request for Continued Examination for consideration of an Information Disclosure Statement. The Information Disclosure Statement has been considered and it is determined that the claims, as amended in the Notice of Allowance mailed 08/02/2010 are in condition for allowance. The Examiner Amendment made in the Notice of Allowance 08/02/2010 is presented again below in order to ensure they are made of record and entered.

**Claim 61:** (Currently Amended) A method, comprising:

receiving, by one or more processors of one or more servers, a query log comprising entries associating prior search queries with selected entity identifiers,

selecting, by one or more processors of one or more servers, a candidate string, from a list of candidate strings, where the candidate string appears in search queries associated with a common entity identifier, of the selected entity identifiers, in the query log and where the candidate string is selected based on a distribution of different candidate strings appearing in prior search queries associated with the common entity identifier,

where the candidate string is selected based on how statistically peaked a count of clicks for the candidate string is compared to counts of clicks for one or more other candidate strings, and

where the candidate string is selected based on entropy of the distribution of counts of clicks for the different candidate strings, and

adding, by one or more processors of one or more servers, the candidate string to a query rewrite table, where the candidate string is associated with the common entity identifier and where, when a previously presented search query is received, the query rewrite table is used to identify the candidate string and include the common entity identifier in a rewritten search query.

**Claim 62:** (Currently Amended) The method of claim 61, ~~where the candidate string is selected based on~~ count of clicks for the candidate string comprises a count ~~counts~~ of clicks on an entity identifier given a candidate string appearing in a prior search query of the query log.

**Claim 63:** (Canceled)

**Claim 64:** (Canceled)

**Claim 65:** (Currently Amended) The method of claim [[63]] 61, where the candidate string is selected based on whether the count of clicks for the candidate string exceeds a combined count of clicks for the one or more other candidate strings.

**Claim 66:** (Currently Amended) The method of claim 61, where the entries of the query log include user behavior information and where the candidate string is selected ~~in part~~ based on the user behavior information.

**Claim 73:** (Currently Amended) A method, comprising:

receiving, by one or more processors of one or more servers, a search query, and  
where the search query includes a string in a query rewrite table, including, in a rewritten search query, an entity identifier associated with the string in the query rewrite table, where the query rewrite table is constructed by:

receiving, by one or more processors of one or more servers, a query log  
comprising entries associating prior search queries with selected entity identifiers;

selecting, by one or more processors of one or more servers, a candidate string  
from a list of candidate strings, where the candidate string appears in search queries associated with a common entity identifier, of the selected entity identifiers, in the query log and where the

candidate string is selected based on a distribution of different candidate strings appearing in prior search queries associated with the common entity identifier,

where the candidate string is selected how statistically peaked a count of clicks for the candidate string is compared to counts of clicks for one or more other candidate strings, and

where the candidate string is selected based on entropy of the distribution of counts of clicks for the different candidate strings; and

adding, by one or more processors of one or more servers, the candidate string to the query rewrite table, where the candidate string is associated with the common entity identifier.

**Claim 74:** (Currently Amended) The method of claim 73, where the ~~candidate string is selected based on count of clicks for the candidate string comprises a count~~ counts of clicks on an entity ~~identifier~~ identifiers given a candidate string appearing in a prior search query of the query log.

**Claim 75:** (Canceled)

**Claim 76:** (Canceled)

**Claim 77:** (Currently Amended) The method of claim ~~[[75]]~~ 73, where the candidate string is selected based on whether the count of clicks for the candidate string exceeds a combined count of clicks for the one or more other candidate strings.

**Claim 78:** (Currently Amended) The method of claim 73, where the entries of the query log include user behavior information and where the candidate string is selected ~~in part~~ based on the user behavior information.

**Claim 85:** (Currently Amended) A system, comprising:

one or more devices comprising:

means for receiving a query log comprising entries associating prior search queries with selected entity identifiers,

means for selecting a candidate string, from a list of candidate strings, where the candidate string appears in search queries associated with a common entity identifier, of the selected entity identifiers, in the query log and where the candidate string is selected based on a distribution of different candidate strings appearing in prior search queries associated with the common entity identifier,

where the candidate string is selected based on how statistically peaked a count of clicks for the candidate string is compared to counts of clicks for one or more other candidate strings, and

where the candidate string is selected based on entropy of the distribution of counts of clicks for the different candidate strings, and

means for adding the candidate string to a query rewrite table, where the candidate string is associated with the common entity identifier and where, when a previously presented search query is received, the query rewrite table is used to identify the candidate string and include the common entity identifier in a rewritten search query.

*Allowable Subject Matter*

5. The following is an Examiner's statement of reasons for allowance: After reviewing the prosecution history and granting further consideration to the cited prior art, it appears that the prior art of record fails to teach and/or suggest all the limitations of independent claims 61, 73, and 85. Specifically, the prior art of record fails to disclose wherein "a query rewrite table is used to identify [a] candidate string and include [a] common entity identifier in a rewritten query" ... "where the candidate string is selected based on how statistically peaked a count of clicks for the candidate string is compared to counts of clicks for one or more other candidate strings, and where the candidate string is selected based on entropy of the distribution of counts of clicks for the different candidate strings."

It is noted that the claimed "query rewrite table" tracks a relationship or association between candidate strings utilized in queries and entities such as online stores, news sources, product categories, brands or manufactures, specific product models, condition of products, authors, artists, people, places, and organizations [Applicant's Published Specification US 2005/0222976: paragraphs [0027] and [0045] and [0054]]. This combination of elements reciting the statistical analysis performed on the candidate strings to determine if a candidate string should be added to the relationship data stored in the "query rewrite table" and the relationship that is tracked by the "query rewrite table" itself, when coupled with the rest of the elements of independent claims 61, 73, and 85 results in a combination of elements which is novel and nonobvious over the prior art of record.

6. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delay, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Reasons for Allowance."
